Predator Pro Billiard Series

ABOUT

WHAT IS THE PREDATOR PRO BILLIARD SERIES?

The Predator Pro Billiard Series, is a series of open/pro events held outside the United States to provide more opportunity for professional and aspiring pool players to compete in high-quality events, earn more income, sharpen their skills, and earn their way into the \$100,000 added Predator World 10-Ball Championship held in Las Vegas each year as part of the CueSports International Expo.

All Predator Pro Billiard Series events play 10-ball, the game that best allows professional pool players to showcase their talent. The format has been devised to create drama and excitement for the fans. For more detail on the format, see the FORMAT section.

We believe that synergy between amateur and professional pool players is critical to the growth of the sport. Amateur pool players want to watch the best and professional pool players need a fan base. The goal is to organize worldwide events that are combined with various amateur events to bring both worlds together.

RULES & GUIDELINES

GENERAL

- 30-second shot clock on the feature table only. For the other tables, the referee(s) will monitor and enforce the WPA slow play rule if necessary.
 - Extended 60-second shot clock after the break
 - One (1) 30-second extension per game
 - The shot clock begins when all balls have come to rest, and the opposing player sits in his or her chair
- No open practice is allowed at all on the feature table. The two players scheduled on the feature table may shoot one rack each prior to the match.
- Between matches, players may practice with alternate racks until match time.
- If a table does not become available until match time or later, players may shoot one rack each prior to beginning the match.

STAGE 1

- 8 players based on the players' Fargo ratings. Random draw for the remaining players.
- Double elimination to the final 8 players (8 on winners' side & 8 on the one-loss side)
- Two sets, race to 4. If the set score is tied at 1-1 after two sets, a spot shot shootout will determine the winner.

STAGE 2

- Final 8 players from Stage 1. A new draw will determine the bracket placement (undefeated player vs one-loss side player). The order of the undefeated and one-loss players will be random.
- Single elimination
- Two sets, race to 4. If the set score is tied at 1-1 after two sets, a spot shot shootout will determine the winner.

BREAKING

- Winner breaks. Lag for the opening break of the first set. The loser of the lag breaks first in the second set.
- Rack your own using the triangle rack provided – opponents may not approach or inspect the rack

SHOOTOUT

If a set score is tied at 1-1 after two sets, a shootout will determine the winner. The goal is to pocket the object ball in its designated pocket. To determine a winner the following system will be used:

- The winner of the lag at the start of the match decides the starting player of the shootout, alternating turns thereafter. One turn by each player is an inning.
- The starting player determines the starting side from which the shootout will begin. Sides will alternate thereafter for each inning.
- Players will shoot four (4) innings in alternating turns. Both players get an equal number of turns.
- The player with the most points (i.e. balls pocketed) after four innings wins.
- If both players are tied after four innings, the order of play will remain until a player reaches a score that cannot be tied by his opponent in the same inning. This is called “Sudden Death.”
 - In Sudden Death, the cue ball must be moved one diamond behind the head string.
- Shot clock extensions may not be used during a shootout.

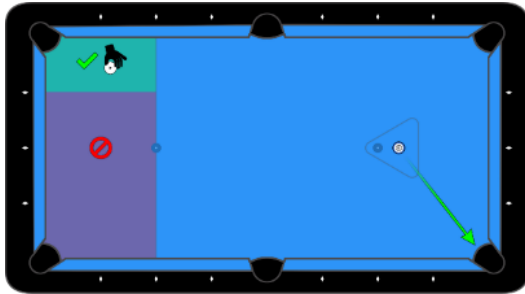

For a shot to be considered legal, the following rules in terms of position and placement must be executed:

- The 10-Ball will be used as the object ball during the entire shootout. The position of the object ball corresponds to its original position in a standard 10-Ball rack.

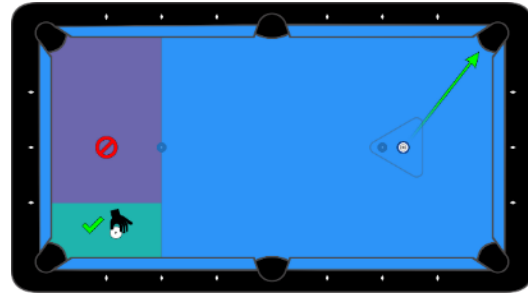

- The same rules of racking apply to the spotting of the 10-ball during the shootout:
 - Players spot their own 10-ball. Opponents may not approach or inspect the ball.
 - Referee spots the 10-ball on the TV table – players may not approach or inspect the object ball or ask for a re-spot.
- There are two zones designated for the shootout, the left and right side, shown below. The player must place the cue ball within the designated zone and pocket the 10-ball in the opposite corner pocket as shown below.
- Players must alternate the zone after each inning.
- The zones can be recognized according to the following parameters:
 - The left side is on the left side of the table while facing the object ball.
 - The right side is on the right side of the table while facing the object ball.

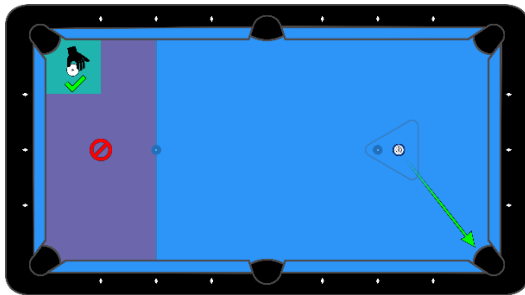

Regulation Shootout (Left Side)

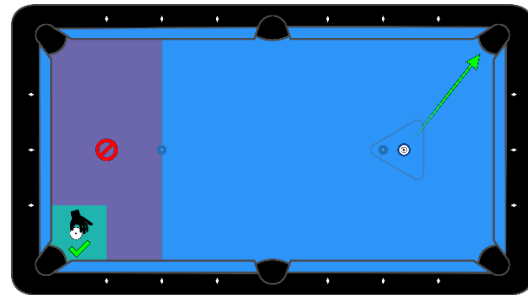

Regulation Shootout (Right Side)

Sudden Death Shootout (Left Side)

Sudden Death Shootout (Right Side)

In addition to the standard WPA rules and regulations, additional rules that are in place that determine whether a shot is considered legal are as following:

- The execution of the shot must be done within the timeframe that has been determined. This can be based on a shot clock ruling or the decision of the acting referee.
- The object ball must be pocketed in its designated pocket. If the object ball is pocketed in any other pocket, it will be considered as a miss.
- A shot that includes the rails, being or resembling a bank or a kick, will be considered a miss.
